

Run of Show

a workflow engine the concierge conducts

A proposal to retire Plane as Beckett's execution backend and replace its one fixed ticket lifecycle with a per-task, concierge-authored workflow: stages, iteration budgets, parallel fan-out and gates composed at filing time — not compiled into the dispatcher.

Status

Proposal — no code
grounded in v3.2 source

```
// All of this validates with zod at filing time, like castings do today. interface FlowSpec { version: 1; entry: NodeId; // where the run starts nodes: Record<
```
